

Medical Writer

Synergy Vision are a growing medical communications agency working with a number of high profile pharmaceutical companies to deliver creative and innovative projects in medical education and events.

We are looking for a Medical Writer to join our growing team.

As a key member of the medical writing team, you will work closely with colleagues in the Account Management teams on a range of medical communication activities, producing quality written materials for key clients in the pharmaceutical industry. If you are passionate about communicating science and delivering creative writing to a high standard, then we'd love to hear from you.

The successful candidate will report to the Principal Medical Writer.

Location: London

Job type: Permanent, with flexible working available upon request

Salary: Competitive, dependent on experience

Interested in applying?

Please submit your CV together with a brief covering letter to:

applications@synergy-vision.com

This job is for you if you have:

- A sound scientific understanding and strong writing ability
- An aptitude for distilling complex scientific information into engaging and effective content, with a keen attention to detail and accuracy
- A high level of personal motivation and initiative
- Excellent communication and interpersonal skills
- An enthusiasm for communicating topics in science and health
- The ability to work independently and effectively in a team across multiple projects
- A flexible and proactive attitude, with the ability to prioritize and work to tight deadlines without compromising quality
- The ability to accept and act on constructive feedback
- A desire to develop your career in a successful and growing agency.

Key responsibilities:

- Prepare high-quality written materials across a range of media, including slides, manuscripts, posters, meeting reports, websites and apps, under supervision and direction of the scientific lead
- Evaluate scientific data and produce clear and accurate materials
- Interact with medical experts in a number of assigned therapeutic areas
- Build and sustain successful client relationships
- Travel to client meetings and events as needed
- Keep abreast of advances and developments in a given therapeutic area
- Build and develop relationships with internal teams, collaborating effectively to deliver projects
- Provide creative and strategic input in meetings and during project development.

You have:

- A strong foundation in science, with an undergraduate degree in a biological or biomedical science
- Excellent written and verbal communication skills
- Intermediate/advanced skills in Microsoft Office
- Excellent organizational skills, with a track record of delivering projects to deadlines.

You might also have:

- A PhD or MSc in life sciences
- Knowledge of the pharmaceutical industry and processes
- Previous experience in medical communications

We offer:

- Competitive salary, pension, 25 days of annual leave, flexible working, season ticket loan, duvet days, free breakfast, Perkbox employee rewards scheme, birthday lie-in, option to purchase additional holiday, team days and socials.
